

SHREYA T

Information Science Engineering Student | Java | DSA | Full-Stack Development

shreyat2936@gmail.com | +91 8073206788 | Bengaluru, Karnataka

Portfolio: portfolio-audc.vercel.app | LinkedIn: linkedin.com/in/shreya-t-502291334 | GitHub: github.com/29-codeeee

SUMMARY

Second-year Information Science Engineering student focused on software engineering, problem solving, and full-stack development. Experience building and deploying web applications using Java, Spring Boot, React, TypeScript, SQL, and APIs, with hands-on hackathon experience. Currently strengthening Data Structures and Algorithms, Java/OOP, databases, operating systems, computer networks, and software design fundamentals.

EDUCATION

B.Tech, Information Science Engineering — JSS Academy of Technical Education, Bengaluru (VTU)

2nd Year | Expected 2028

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, SQL, HTML/CSS

Frameworks & Libraries: Spring Boot, Fastify, React (Vite), Tailwind CSS

Databases & Tools: MySQL, PostgreSQL, Prisma, Supabase, Docker, k6, Git/GitHub

Core: Data Structures & Algorithms, OOP, REST APIs, JWT/BCrypt Authentication, Concurrency Control, Saga Pattern

PROJECTS

BookGuard — Distributed Transaction Integrity for Multi-Provider Travel Bookings

TypeScript, Fastify, PostgreSQL, Prisma, React, Docker, k6 | GitHub: github.com/29-codeeee/BookGuard

- Built a transaction-integrity platform for multi-supplier travel bookings (flights, hotels, trains, transfers) that avoids distributed 2PC, using PostgreSQL row-level locks and reservation locks to guarantee zero overselling under concurrent load.
- Implemented a Saga orchestration engine with forward reservation and reverse (LIFO) compensation plus payment void/refund, so failed multi-provider bookings roll back atomically.
- Designed a durable idempotency layer (SHA-256 payload hashing) that replays retries exactly once and rejects tampered payloads (HTTP 422); quarantines locks on failed rollbacks to prevent double-selling.
- Added a supplier risk-scoring engine, a rule-based recovery advisor, and a React dashboard; validated with 95 backend and 35 frontend tests, k6 stress runs, and failure-injection experiments.

HaemoLink — Emergency Blood Coordination System

Java 17, Spring Boot, React 19, MySQL | Live Demo: haemo-link-sable.vercel.app

- Scoped a full-stack platform for emergency hospital-donor coordination, covering urgent requests, donor matching, and inventory workflows.
- Implemented Dijkstra's algorithm for hospital routing and an ABO/Rh compatibility engine for donor-recipient matching.
- Designed FEFO (First-Expiry-First-Out) inventory queuing to reduce blood wastage and integrated SMS alerts via MSG91.
- Implemented JWT authentication and BCrypt password hashing; presented the platform to non-technical stakeholders at a college innovation showcase.

MediScan AI — AI-Powered Prescription Reader

Gemini API, Web Application | Live Demo: mediscan-2025.vercel.app

- Built a web application that scans and interprets handwritten and printed prescriptions using the Gemini API for image recognition and text extraction.
- Generated automated health insights and medicine information from scanned inputs to reduce manual lookup effort.
- Designed a simple upload-and-scan workflow focused on accessibility for non-technical users.

AgriAssist — AI Crop Health Monitoring

AI / Computer Vision

- Built an AI-powered crop monitoring application that detects crop diseases from uploaded photos using image classification.
- Designed a farmer-facing dashboard focused on simple presentation of crop-health information.

ZenAI — AI Yoga Trainer (Hackathon Build)

Health & Wellness | Live Demo: yogaguiderr.vercel.app

- Built a personal yoga trainer using pose detection to guide users through yoga poses.
- Implemented real-time posture feedback and scoped an MVP for a 24-hour hackathon.

ACHIEVEMENTS

- **Runner-Up, Navotthana Hackathon** — 24-hour hackathon organized by the AIML Department

INTERESTS

Hackathons & software projects • Logic puzzles & strategy games • Technology products & startup ideas • Community service & volunteering
